

December 22, 2010

Dear Emergency Responder/Response Agency,

Schoharie County, Director of Emergency Services/Fire Coordinator, LEPC, Judith Warner (518) 295-2200 Fax (518) 295-2277

Schoharie County, Sheriff, Anthony F. Desmond (518) 295-2266 Fax (518) 295-2267

Over the next several days and weeks, Enterprise TE Products Pipeline Company LLC, formerly TEPPCO, will be conducting operations related to the hydrostatic testing of the portion of our propane pipeline from our pump station in Jefferson, New York and our Selkirk, New York terminal. During this time you may notice the presence of vehicles, equipment and personnel working near the pipeline and this letter is intended to keep you apprised of our activities.

Hydrostatic testing is a safe and environmentally friendly method used to confirm the integrity of pipelines and involves injecting water at pressures in excess of our normal operating conditions. A non-toxic green dye is added to the water to help locate any leaks that may occur during the test. To further assist in detecting any leaks, field personnel will be stationed at regular intervals along the pipeline right-of-way, with additional monitoring provided by aerial patrols.

A toll-free hotline, established to provide the public with periodic updates on the status of pipeline activities and a means to ask questions or leave a message, can be accessed by calling 888-883-6305. You may bypass the opening message by pressing the # key. You will be notified should there be a significant change in the testing schedule.

As you forward this notice to other Emergency Response agencies within your jurisdiction, please include my email address, dfayers@eprod.com in the cc: field. Also, if possible, please post to the county Web-Site.

The hydrostatic testing sections include areas listed below:

Schoharie County, in the town of Jefferson, Blenheim, Gilboa and Broom.

Don Ayers, 607-535-8711, 607-725-3486 cell, dfayers@eprod.com
